EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, page 1, after the title and before background of the invention, please insert the following paragraph

---This application is a divisional of 10/076,984, filed on 2/15/02, now US 6,686,432.---

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn

Art Unit: 1713

pursuant to 37 CFR 1.114. Applicant's submission filed on 5/20/05 has been entered.

3. The terminal disclaimer filed on 3/30/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6,784,247 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Applicant's amendment to claim 45, and the cancellation of claims 63-83 and 85-98 filed on 5/20/05 is acknowledged. Claims 45-62, and 84 are pending in this application. In view of applicant's amendment and remarks, previous 103 rejection of the pending claims over US 6,191,225 is hereby withdrawn. Prior art copolymer is derived from atom transfer radical polymerization using transition metals and initiators, wherein the ATRP initiator becomes part of prior art copolymer product. Hence there is unobvious differences between prior art copolymer product and applicant's, which is formed in the presence of a conventional free radical initiator, and in the absence of Lewis acids and transition metals. Accordingly, the instant invention as defined by claims 45-62, and 84 is now allowable with respect to closest prior art of record.
